

LexiCom

Meet customer mandates easily, affordably, and on time

Client software for secure Internet-based communications

VersaLex Suite

Suppliers are facing growing customer demands to exchange data securely over the Internet. Both the supplier and the customer stand to gain substantial benefits with moving to Internet-based data exchanges: information is received more quickly resulting in decreased business cycles, VAN charges can be lowered, or even eliminated, plus, industry-standard security protects confidential data from falling into the wrong hands. While the benefits may be clear, the initial task of compliance can seem burdensome and finding the right solution can be confusing. With over 20 years assisting suppliers with their communication requirements, Cleo takes its experience to market in delivering a truly easy-to-use, yet powerful and reliable client software package, LexiCom.

Achieve a Rapid Deployment

Many products claim they are easy to use, yet not all products are the same! LexiCom offers several unique features and self-help tools that go the extra step in ensuring rapid deployment. The average installation and set up takes just 30 minutes. Additionally, LexiCom integrates with all major EDI translators. This allows the EDI operator to utilize the familiar translator interface to handle communications, avoiding time and resources to retrain or learn a new process. Over 30 integration packages are available.

Meet Customer Mandates

Successfully meet customer mandates with a Drummond certified product. As an ongoing participant in eBusinessReady interoperability certifications, Cleo is an experienced partner in secure communications. Interoperability means that our product will successfully work with any other certified product (e.g. a customer's server). VersaLex, the core technology in LexiCom, is Drummond certified for secure AS2, AS3, and ebXML Messaging Service (ebMS, HL7, CDC-PHIN, STAR), as well as FTP, FTP/S, OFTP, SSH FTP, FTP/PGP, MQ Series®, HTTP, and HTTP/S connections.

Gain Power & Flexibility

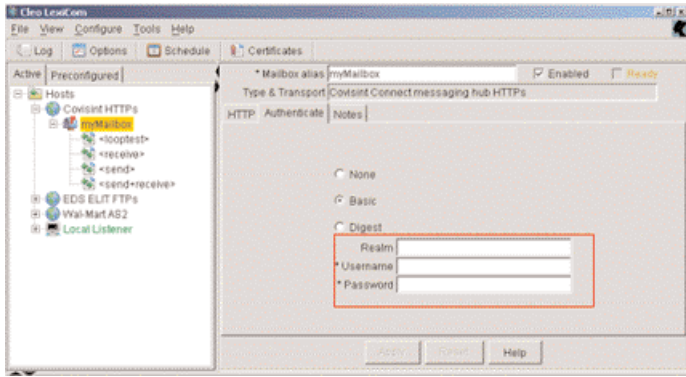

LexiCom is not limited to just one or a few trading partner connections. It has the power to handle multiple connections and any data type including EDI and XML. Additionally, an extremely powerful and flexible command-line API allows the user to manipulate almost every trading partner parameter on the fly. This allows for complete control and customization based on real-time, unique scenarios.

Plan for the Road Ahead

Chances are an initial mandate for secure communications won't be the last. LexiCom is a solution that can scale to meet future requirements. As additional trading partners require IP-based communications, simply configure the new trading partner host or contact Cleo for an available pre-configured host. Plus, as standards evolve and new ones develop, Cleo makes these available within its new releases. With a current support subscription, upgrades are just a few clicks away.

Cleo Makes it Easy

- **Pre-configured Hosts:** Reduce set up time with connections to popular trading partners including Wal-Mart, Lowes, Target, FoodLion, Home Depot, DaimlerChrysler, Covisint, and many others. Over 300 available.
- **EDI Translator Integration:** Leverage your existing EDI translator. Easily build integration files via user-specified actions and configurations. Over 30 available.
- **AS2 Wizard:** Quickly configure AS2 trading partners. Simply follow a series of on-screen steps.
- **Certificate Manager:** Easily create and manage required certificates. Full-featured and very intuitive. Perform all certificate-related tasks such as generating self-signed certificates and certificate signing requests (CSRs), exporting PKCS12 certificates, etc.
- **Integrated Scheduler:** Set transmissions to occur automatically, at any time or interval.
- **TCP/IP Port Usage Report:** Eases implementation when a firewall is in place. Within LexiCom, a TCP/IP port usage report can instantly be generated and provided to the firewall administrator. This report gives the firewall administrator everything needed to configure the firewall rules.
- **Program Help, Online FAQs and Web Videos:** Instantly get access to information and tips.

LexiCom users can reduce set up time with preconfigured “host” connections to hundreds of popular trading partners. The majority of configuration is complete; simply activate the host and fill in supplier specific information such as user name and password.

Meet Budget & Achieve a Quick ROI

LexiCom allows suppliers to get started with Internet communications without breaking the bank. Affordable base packages allow users to start with one or a few connections and economically add connections at any time. Multi-connection packs offer the best value for those companies facing additional upcoming mandates or planning for future growth. The combination of an affordably priced solution and the scalability of the product to grow with your requirements, provides a quick and powerful ROI.

Leverage Reliability & Performance

When it comes to doing business with key customers, taking risks is not an option. LexiCom is a mature, proven software product with over 5,000 installations worldwide. The software has been available commercially for over four years and has successfully completed five consecutive rounds of eBusinessReady certification. Transaction verification is another important consideration. Users can monitor and confirm the successful completion of all scheduled transmissions using the LexiCom software’s perpetual, printable log file.

Ensure Success

Obtaining the right software is only the beginning of a complete solution. When required, assistance from Cleo’s expert support team is readily available. A built-in “support bundle” tool outputs your configuration details to our staff with the touch of a button, to expedite problem resolution. Cleo’s support team is known within the industry for providing top notch service with a quick turn around time.

Cleo is your best partner for integrated, reliable, secure communications. For over 20 years, Cleo has been helping thousands of companies with their data communication needs. Over 100,000 installations in manufacturing, retail, healthcare, financial, automotive, and other markets rely on Cleo products. Any trading partner, any network, any protocol, Cleo has your connection.
